Art Unit: 1623

The information disclosure statement filed November 2, 2010 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 12, 14, 15, 17, 21, 22, 26, 30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bijlsma et al (WO 00/57727) in combination with De La Torre et al (Riviste Italiana D Nutrizole Parenterale Ed Enterale, Vol. 21, No. 3, pp. 105-111, Wichig Editore, Milano IT, January 1, 2003).

Art Unit: 1623

Bijlsma et al disclose nutritional compositions which contain slightly negatively charged non-digestible polysaccharides having mw of 8 kD to 40,000 kD and viscosity of less that 20 mPa.s (page 1, lines 28-31) and preferably less that 10 mPa.s (page 4, lines 31-33). Bijlsma et al also disclose that complete foods and food supplements containing said polysaccharides can be used to treat an inflammatory bowel disease (IBD) such as Crohn's disease (page 6, lines 4-6). In Example 1, on page 7, Bijlsma et al disclose one such polysaccharide being galactomannan derived from hydrolyzed guar gum and in Example 6, on page 8, Bijlsma et al disclose such a polysaccharide in combination with protein based on casein for the treatment of inflammatory bowel disease. Bijlsma et al further disclose said product in liquid form (page 8, lines 8-15). Bijlsma et al do not specifically disclose partially hydrolyzed guar gum in the absence of further chemical modification.

De La Torre et al disclose the use of galactomannan derived from partially hydrolyzed guar gum for the treatment of IBD. Based on the disclosures by Bijlsma et al and De LaTorre et al, it would have been prima facie obvious to a person of ordinary skill in the art at the time of the claimed invention to use partially hydrolyzed guar gum disclosed by De La Torre in the method disclosed by Bijlsma et al because partially hydrolyzed guar gum in the absence of further chemical modification was know to be useful for treating IBD as disclosed by De La Torre, i.e. the results obtained by such substitution would have been expected.

Applicant's arguments filed November 2, 2010 have been fully considered but they are not persuasive.

Applicant contends that the test data in Test Examples 1-1 to 1-3 and Figs. 1-3 demonstrates superior results in that employed galactomannan not only shows histologically ameliorative action for IBD, but also has suppressive action on inflammation, and lowers the activity of MPO and TNF-α. Applicant also contends that the test data in Test Examples 2-1 to 2-4 demonstrates superior results with respect to the present invention. The test data has been considered but has not been found persuasive since the effectiveness of guar for the treatment of IBD would have been expected from the combination of teachings by Bijlsma et al and De La Torre et al. The additional effect of lowering activity of MPO and TNF-α with administration of guar gum would have been inherent in the methods disclosed by Bijlsma et al and De La Torre et al.

Applicant contends that De La Torre disclose galactomannan having mw of 220, 000 daltons. This argument has not been found persuasive since said mw refers to galactomannan before hydrolysis. Further, applicant has not pointed out how a hydrolysis by β-mannase results in a galactomannan having different properties and/or activity.

Therefore, the claimed methods are still dimmed prima facie obvious over the cited prior art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1623

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 8.00-4.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shaojia Jiang can be reached on (571) 272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
